

The Samaritan Archive 2.0 Project

Tailoring the digital archive to the needs of cultural and community stakeholders

Jim Ridolfo - University of Cincinnati - **@ridolfoj**

Assistant Professor of Composition and Rhetoric

Mike McLeod - Michigan State University - **@mcleodm3**

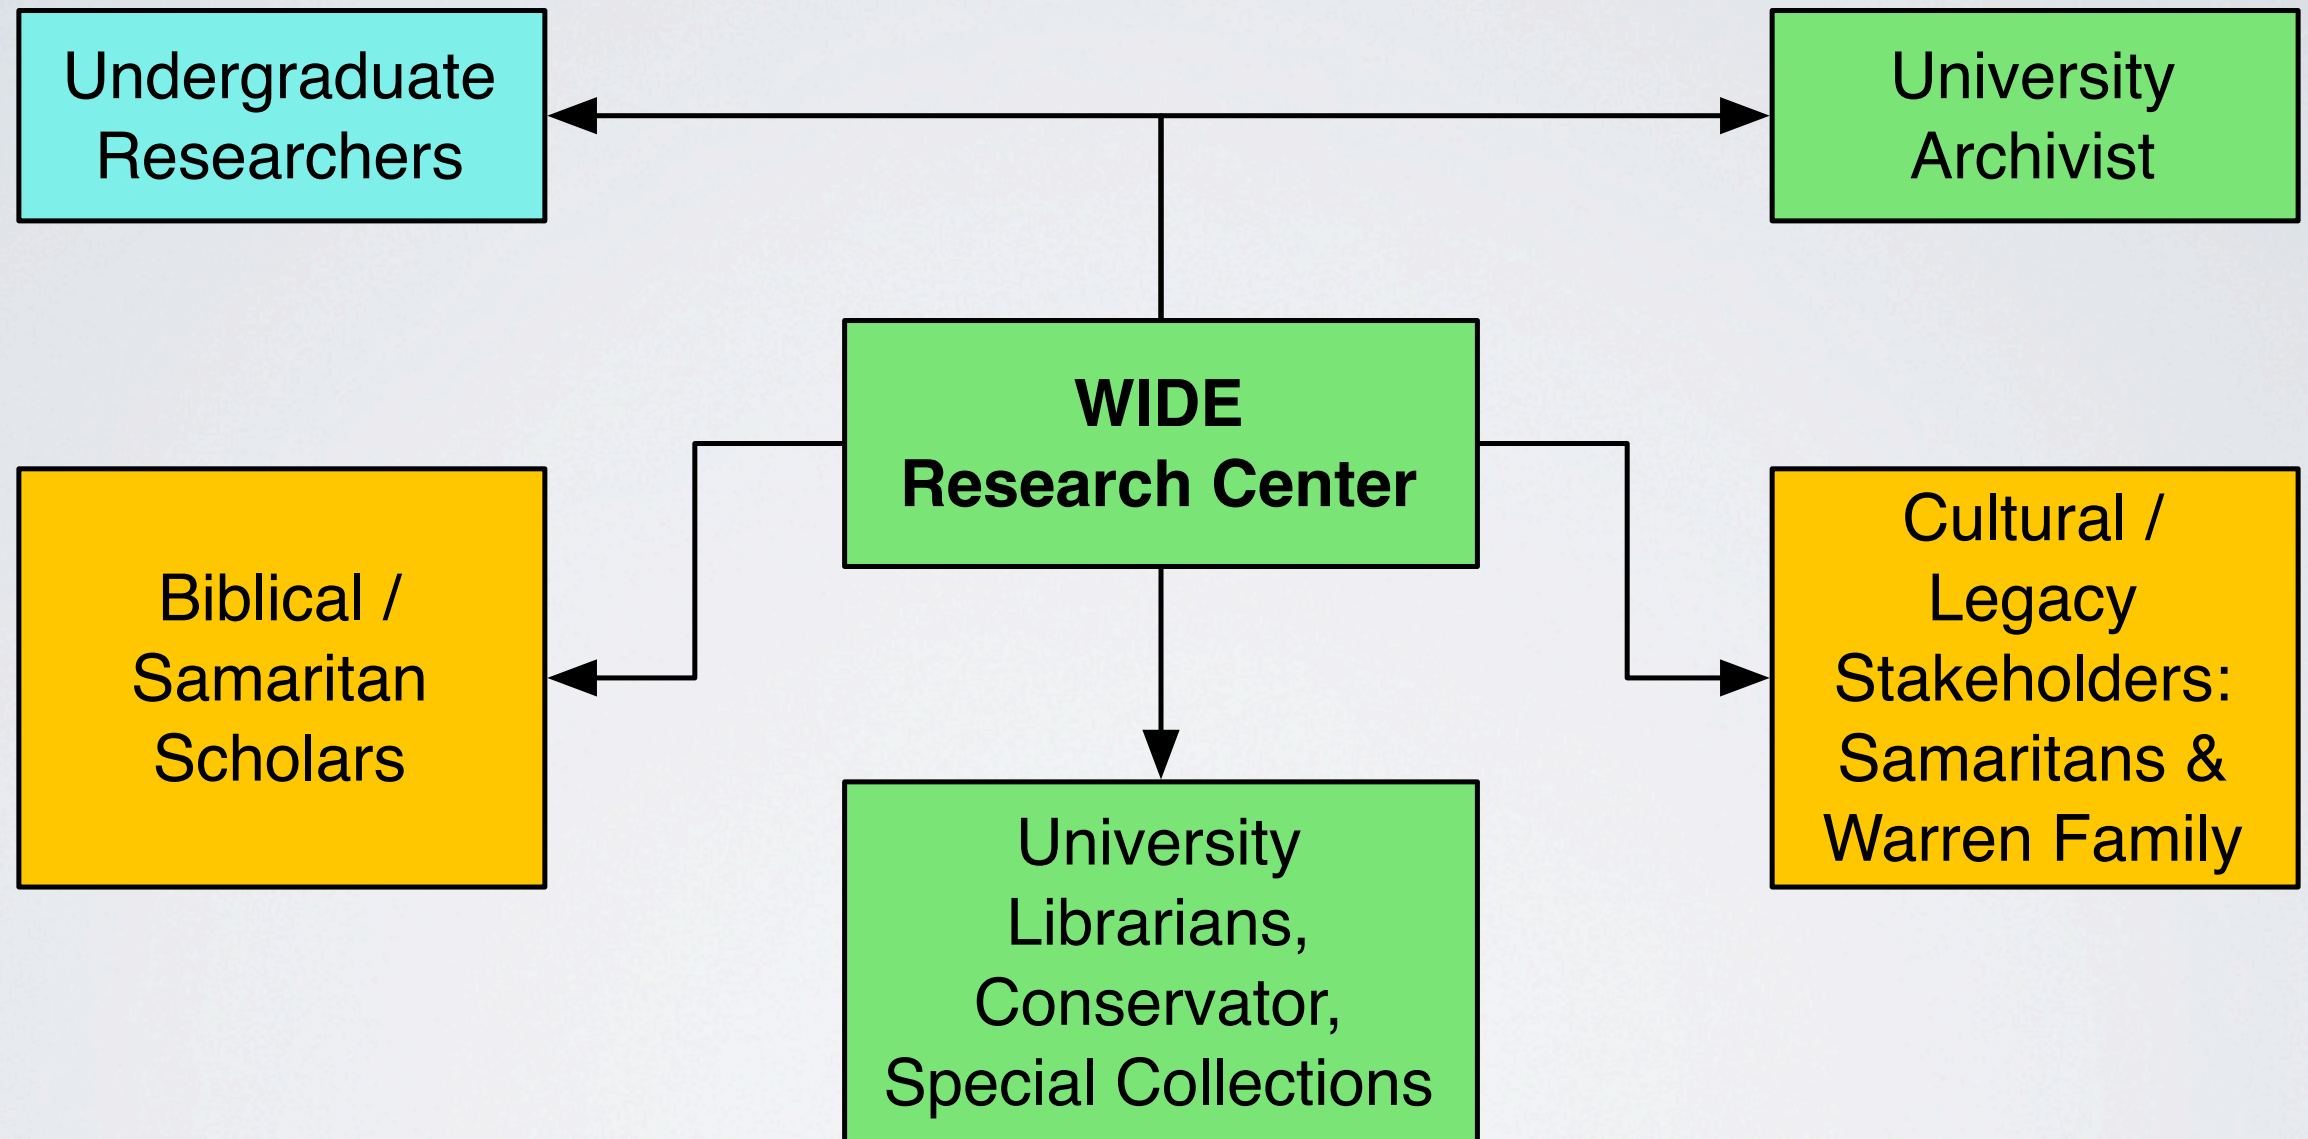

User Experience Researcher and Systems Designer, WIDE Research Center

Project Goals

- To create a working model of a **culturally-sensitive repository** of Samaritan texts
- Support a variety of learning activities including **online teaching, learning, and research**
- Provide access to digital versions of the scrolls enhanced with **Web 2.0**
- Follow a model of system development consistent with best practices of **user-centered design**

Collaboration

Stakeholders

University Units

Students

Phase I: Stakeholder Interviews

Interviews with key stakeholders in a digital Pentateuch archive to develop an initial set of design prototypes the team believed would best meet their various requirements.

Professor Robert Anderson,
Samaritan Scholar,
Michigan State University

Binyamin Tsedaka,
Samaritan Elder,
Holon, Israel

Phase I, part 2: Low-fidelity Mockups

With a basic understanding of features and functions the stakeholders required, the team began brainstorming ideas for interface designs that would meet their needs.

Low-fidelity prototype design informed by initial interviews

Phase II: High-fidelity Mockups

Having done the initial interviews and brainstorming, the research team developed a series of higher-quality mockups to demonstrate potential interfaces.

High-fidelity mockup based on initial research and team inspiration (utilizes an ancient Hebrew text – created before Samaritan texts scanned)

Phase III: Field Research

Two members of the research team travelled to Israel and the West Bank to get feedback on the prototypes and to observe the ways in which the Samaritans use their sacred texts.

The Samaritan Community on Mount Gerizim in the West Bank

Phase III: Field Research

The research team was warmly welcomed by the community and granted permission to conduct interviews and given access to many private libraries.

Binyamin Tsedaka, the Samaritan High Priest Elazar ben Tsedaka ben Yitzhaq, Gus Whalen, the great-grandson of E.K. Warren, and Jim Ridolfo, WIDE Research Center.

A2.0 *Archive*

Understanding how the Samaritans use their sacred texts gave the team greater insight into how a useful online archive might work.

Phase III: Field Research

A 14th-Century Samaritan Pentateuch from a private family library. Each piece of cloth represents one generation of family ownership.

Using input from the community, a working prototype was built to assist in gathering archive information that would be useful to the Samaritans - data that would be invisible in a traditional archive.

Prototype asked users to identify portions of the text in a scanned page.

Next Steps

- Preservation and digitization of three MSU Pentateuchs
- Building a fully-functional web-based archive for multiple stakeholder communities
- Cultivating partnerships with other libraries to digitize more Samaritan texts
- Integrating archives with social networks to encourage greater community participation
